Power in the Palm of Your Hand

Say Organiser, and you’ll immediately think of Psion’s range of pocket-sized Personal Organisers. Which isn’t really very surprising … with our Psion Organiser II, we pioneered a whole new and exciting trend in electronic personal management, enabling anyone and everyone to organise their domestic and business lives efficiently and productively.

The Psion Organiser II makes important, relevant information available, quite literally, on tap. It simplifies the search for vital facts, providing the answer within a fraction of a second on the meagrest of clues. It reminds. It calculates. It evaluates. It simplifies life. Considerably.

And the Psion Organiser II is, of course, a powerful computer that can be held in the palm of the hand but with an ease that makes it instantly useable.

Four Powerful Models to Choose from …

All four models have a large internal RAM memory, three expansion slots that take an extensive range of additional software, peripheral units and memory packs, plus a highly sophisticated yet easy to use built-in computer language enabling very fast, highly structured programs to be written for individual requirements. *

* Organiser II models CM and XP are available in English, French, German, Spanish, Italian, Portuguese, Danish, Dutch, Turkish, Swedish and Norwegian.

These built-in functions enable you to …

- Store all your vital personal information — such as names, addresses, phone numbers, expenses and so on — and to retrieve it again by typing in two or three letters as a clue. The automatic cross-referencing system does the rest, displaying what you want on the screen in less than a second.

D. Fisher, Q.C. 
01-588-1234

- Make calculations: your complete entry is displayed on the screen, permitting you to make changes in the figures if necessary. The calculator has 10 permanent memories, over 50 mathematical and scientific functions and is programmable as well.

\[ m9+4.7\times\cos\left(\frac{\pi}{8}\right) \]
\[ =4.34223380279 \]

- Record appointments in the diary by date and time, from now until the year 2000. You can browse through your entries, go to specific dates or find a particular entry. An audible reminder alarm can be set and the impending appointment is temporarily displayed on the screen.

Jun:23:Fri:10:30
Kate at Marks

- Set up to eight separate alarm clocks to ring at hourly, daily or weekly intervals.

- Refer to the clock showing weekday, date, month, year, hours, minutes and seconds.

- Check how much memory you have used in the internal memory and on fitted Datapaks.

- Use the powerful programming language, ‘OPL’ to create your own programs.

cls: Print time until time > 30
Models LZ and LZ64 – More Memory, More Functions

As you would expect from the inventors of the Electronic Organiser, Psion have produced the most comprehensive Organisers yet, the models LZ and LZ64.

- The four line 80 character screen means more information at a glance.
- The Diary is a neat, simple solution to time management. It provides you with a daily or weekly view with start and end times for efficient appointment planning.
- including an optional audible alarm. PLUS a graphic representation of the weekly overview with any free time being instantly visible.
- The Notepad lets you keep easily retrievable memos, lists, “things to do”, expenses and business notes. In fact, the notepad will also number lines, calculate and sort your data, and you can password protect it.
- The massive 64K RAM memory in the LZ64 stores approximately 10,000 words (the equivalent of 30 full typewritten pages) that can be retrieved with a single click.
- The cross referencing filing system allows you to sort records alphabetically, establish multiple files by specific category, and to search within each file or across all files, programs, notepads and diaries automatically, to retrieve data.
- There is password controlled access to the machine to prevent unauthorised access.
- The 12 or 24 hour clock has a stop watch and timer.

- The 8 independent alarms can be set hourly, daily, weekly, monthly or even for the work week only.
- International dialling codes and world time for 400 cities in 150 countries are available wherever you are.

Programmability

Built into all our Organiser II models is a powerful operating system and programming language called OPL designed to enable you to write programs easily to solve specific problems. The high-level OPL language is essentially drawn from BASIC but developed further by Psion engineers using modern structured programming concepts. It is procedure-based, comprehensive and very fast.

Within OPL are full database facilities, enabling you to create files, define, search and locate fields and records quickly and easily.

Using the Organiser II Developer which runs on IBM PC and compatibles, you can also develop, test and debug your own programs on your PC before transferring them to any of the Organiser II models.

Summary Specifications – Built-in Software

<table>
<thead>
<tr>
<th>Compatibility</th>
<th>Model CM and XP software is upwardly compatible to LZ and LZ64.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menus</td>
<td>Functions selected from a menu using cursor or pen. The main menu can be customized by the user.</td>
</tr>
<tr>
<td>Filing</td>
<td>Cross referencing filing system using simple MKT and PND menu items. Automatic scrolling on screen. Text editing facilities. Finds all records which match given search code. Records can be added, removed, copied or updated. Maximum 255 characters per record over 16 fields (text). Average access time 0.3 seconds for 25K of data. All files accessible from programming language. Model LZ and LZ64 include sorting and printing of multiple files on each storage device and “wildcard” search codes.</td>
</tr>
<tr>
<td>Notepad</td>
<td>LZ/LZ64 only. Free form note taker with built-in calculation and numbering facilities for menus, lists, expenses, business notes, records. Password protection (with encryption) and sorting options.</td>
</tr>
<tr>
<td>Diary</td>
<td>Tabular form: days horizontal, times vertical. Appointment slots selected with cursor keys, or PND and GOTO menu items. Text description for each appointment. Reminder alarm can be given any number of appointments by up to 39 minutes. Diary may be viewed to remove old entries, saved in or restored from a storage device. CM and XP: appointment slots at 30 minute intervals. Start time for each appointment may be selected. LZ/LZ64: appointment slots at 15 minute intervals. Start and end times may be selected. Week-at-a-view graphic representation.</td>
</tr>
</tbody>
</table>

Time, Alarms and Calendar

- 24 hour clock (year, month, day, date, hour, minutes, seconds)
- LZ/LZ64 have time to the nearest 1/15 minute, 1998
- 24 hour clock and daylight saving time, 1 hour countdown timer and stopwatch with lap times
- All models have up to 8 alarms, that may be set with weeks, daily or hourly repeat
- LZ/LZ64 include Monday to Friday repeat, choice of alarm sound and a monthly calendar

Calculator

- 12 digit accuracy
- 10 memories
- Complete calculations can be entered and edited to correct mistakes or use "what if" facility
- Unlimited number of brackets may be used. Upper can set 0 to 12 decimal places, 50 maths and scientific functions and user programmed functions

Data Storage Devices

- One internal (A), two external (B,C) for removable memory packs
- Dotspeaks for secure battery-independent long-term storage, Remotes and Program packs

World Time and International Codes

- LZ/LZ64 only. International dialling codes for 400 cities in 150 countries plus local time

Programming

- All models contain a powerful, procedure based programming language
A Range of Organiser II Software and Peripherals Engineered to Suit Your Life

Memory Packs

With Datapaks and Rampaks, it is possible to build an unlimited library of personal data and programs for everyday or specialised use.

DATAPAKS: Are the equivalent of floppy discs in PCs, don’t require a power back-up and are less volatile than RAM memory, so they keep your information permanently safe even when removed from the Organiser II. They are available in sizes 16K, 32K, 64K and 128K and each machine can take two at a time giving as much as 320K of on-board memory in our LZ64 model.

RAMPAKS: Are an ideal alternative if the information being stored needs to be frequently edited or revised. (Excluded from model CM).

FORMATTER: Erases two Datapaks in just 30 minutes leaving them blank for re-use.

Psion Printer II

A purpose designed, dot matrix portable thermal printer with 20, 40, 60, 80 column and 256 dots per line graphic modes, underline and double height options and built-in rechargeable battery pack. The charger doubles as the Organiser II AC mains adaptor. Organiser II top slot devices (such as RS232 Comms Link) plug into the printer and it has an optional integral magnetic card reader. It prints up to 80 characters per line at a speed of approximately one line per second.

Program Packs

Program packs are pre-programmed software that can cover almost any subject from calculating your mortgage payments to how to buy a cup of coffee in Spanish. The possibilities are endless, and there is a wide variety of software packs currently available on the market.

FINANCE PACK: Will do everything from complex financial calculations to keep track of and record expenses and bank accounts giving you a detailed bank statement at all times. Calculates discounted cash flows, interest, annuities, mortgages; records, monitors and analyses expenses as they take place.

SPELLING CHECKER: Just type in the first few letters to define the word, and the Concise Oxford Spelling Checker, with over 24,000 words available, will display the correct spelling.

POCKET SPREADSHEET: A full function spreadsheet, 26 columns by 99 rows, that is compatible with Lotus 1-2-3™ Ideal for performing both simple and complex analysis, it will also accept Lotus 1-2-3™ worksheets directly from a PC. (Excluded from model CM).

FORMULATOR: Accepts formulae just as you would write them, prompts for numeric values and displays the results. Hundreds of built-in formulae and conversions handle everything from simple sales tax calculations to more complex engineering problems.

TRAVEL PACK: Provides a translation dictionary with over 700 words and phrases translated between English, French, German, Spanish and Italian, currency conversion, weights and measures, clothes size conversion, and dialling codes.

PORTFOLIO: For the private investor, records share, unit trust, gilt and bond investments, the updating of prices and the buying and selling of holdings. Keeps track of fees and dividends.

MATHS PACK: The fast and easy way to solve Bessel functions, polynomial equations, quadratics, the solutions of matrices, Eigen values and more.

Communications Link

Psion Organiser II has a standard peripheral port at the top of the machine to allow a wide variety of devices to be attached for communications and specialised applications. Once the peripheral has been connected, additional commands which access the peripheral are activated automatically within Organiser II.

By simply plugging in the sophisticated COMM'S LINK interface and cable, the portable Organiser II talks to printers, computers and communication devices equipped with the industry standard RS232 port. Records and files can be transferred in either direction, from the Organiser II to the printer, computer or modem, or from
Summary Specifications - OPL Programming Language

### Language

- **PROCEDURE-BASED**: Basic user interface.
- **DIAGNOSTIC**: Easy error reporting.

### Constructs

- **E**: Enter.
- **EXIT**: Exit.
- **END**: End.
- **DO**: Do loop.
- **ENDWH**: End while.
- **BREAK**: Break loop.
- **CONTINUE**: Continue loop.
- **GO TO**: Go to.

### Variables

- **LOCAL**: Local, global, single and array.
- **REAL**: Integral, string, field.

### Commands

- **AC**: Access.
- **BEEP**: Beep.
- **C**: Change.
- **CLEAR**: Clear screen.
- **EDIT**: Edit.
- **ESC**: Escape.
- **GOTO**: Go to.
- **HELP**: Help.
- **INPUT**: Input.
- **JUMP**: Jump.
- **KEYS**: keys.
- **LABEL**: Label.
- **LINE**: Line.
- **PAUSE**: Pause.
- **PRINT**: Print.
- **READ**: Read.
- **RENAME**: Rename.
- **RETURN**: Return.
- **SLP**: Sleep.
- **TRAP**: Trap.
- **APPEND**: Append.
- **COPY**: Copy.
- **CREATE**: Create.
- **DELETE**: Delete.
- **EDIT**: Edit.
- **FIRST**: First.
- **LAST**: Last.
- **NEXT**: Next.
- **OPEN**: Open.
- **CLOSE**: Close.
- **POSITION**: Position.
- **KEYS**: Keys.
- **UPDATE**: Update.
- **USE**: Use.

### Functions

- **PRINT**: Print.
- **DISPLAY**: Display.
- **DISPLAY**: Display.
- **CLEAR**: Clear.
- **KEYS**: Keys.
- **LABEL**: Label.
- **RETURN**: Return.
- **SLP**: Sleep.

### Additional Functions

- **SECOND**: Second.
- **MINUTE**: Minute.
- **HOUR**: Hour.
- **DAY**: Day.
- **MONTH**: Month.
- **YEAR**: Year.

### Memory

- **ROM**: 32K (models CM and CP or 64K models CM2 and CM2A). Contains operating system, OPL language, and built-in applications. RAM: 8K - model CM, 16K - model CM1, 32K - model CM2, 64K - model CM2A. (16K of memory equivalent to 128K of information).

### Mass Storage

- **Floppy disk drive**: Includes 8-inch, double-density floppy disk drive for secondary storage. Included with all models.

### Power

- **Power supply**: 15V DC (500mA), 12V DC (300mA). Power consumption for operation is 20W.

### Dimensions

- **Height**: 25 cm (10 inches)
- **Width**: 32 cm (12.5 inches)

### Weight

- **Approximately 250 lbs (113 kg) without battery pack."

### Keyboard

- **Keyboards**: Multiple keyboards available. 101-key standard, 104-key extended, and 105-key enhanced models.

### Operating Temperature

- **0 to 70°C (32 to 95°F)"**
